

CameronsCarSite.com

Camerons Car Site is a hub for tutorials, pictures, and general videos of car and motorcycle related content that I do myself.

Camerons Car site gives users information through tutorials that range from doing a simple oil change, rebuilding carburetors, to paint cleaning and polishing that I do on my own cars. The site also lets users see the progress on the various projects that I work on and get information that might help them in a similar project. Camerons Car Site also serves as a place for me to show pictures and videos of events that I go to so users can see unique and interesting cars from cars and coffee to the Woodward dream cruise.

## PERSONAS
